I support the Draft's cleanup option "G" with amendments, namely that the goal of the cleanup must be to end the Fish Consumption Advisory, for all individuals, including breast feeding women, related to pollutants found in the Portland Harbor. The EPA must provide a date by which the advisory will be lifted.

The EPA's plan removes far too little contaminated sediment from the river.

I've been informed that we should recommend that at least 1000 acres of polluted sediment be removed.

The EPA's plan prescribes far too much "Monitored Natural Recovery" which in essence leaves polluted material in the river, and monitors it over time.

Those who have liability for the PCBs, PAH, DDT and other toxic and persistent pollutants in the river sediments, must meet their community obligation to do the right thing and conduct a comprehensive and timely cleanup.

The river is a precious commodity and we need it clean and healthy for our and future generations. It's a lifeline. Thank you. --(b) (6)
